

LogicGate's Third-Party Risk Management module helps your organization build strong third-party relationships that do not expose you to unacceptable levels of risk.

## The Power of LogicGate:

- Eliminate your reliance on spreadsheets and emails
- Automate sending and follow-up of vendor risk assessments
- Tier third-party vendors based on risk profile or service offering
- Assign and track mitigations and remediations
- Customize workflows to match your approval processes
- Integrate with existing procurement, contracting, and accounts payable processes
- Analyze and remediate your risks with intelligent reporting
- Collaborate on a single source of truth with a centralized repository of vendors, assessments, risks, and mitigations
- Connect to other LogicGate modules like Controls Management and Enterprise Risk Management

"The best part about LogicGate is the flexibility it provides fast-paced organizations to implement new processes and adapt as the company continues to change and grow. With LogicGate, we have been able to streamline our risk assessment process and equip business owners with the information they need to assess and mitigate risks on their own."

*Head of Risk and Compliance, Healthcare*

## Controlled, Repeatable, and Transparent Process

LogicGate centralizes your third-party risk management process to align your organizational goals and improve transparency.

## Tailored to Your Businesses Needs

Use our best practice assessment templates, or customize your third-party risk management questionnaire in minutes.

## A Single Source of Truth

Ensure you have a central repository of vendors, assessments, risks, and mitigation.

## Improve Accountability

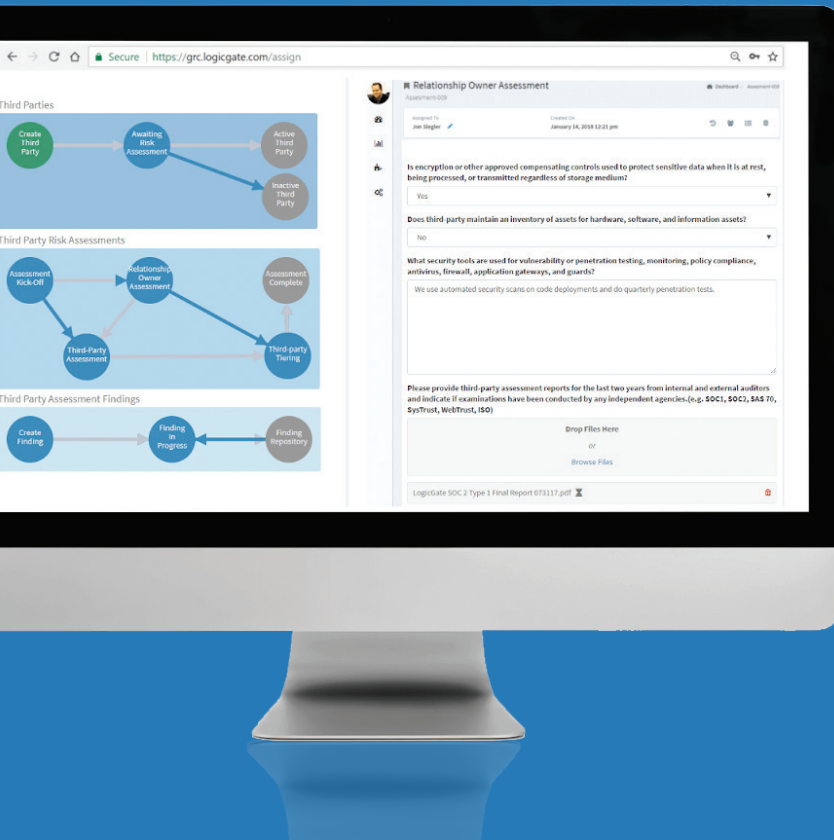

Automate risk remediation tasks with configurable rules and scheduled follow-ups.

## Builds Dynamic Risk Relationships

Build multi-tiered links between vendor risks and other components of your organization.

## Powerful Reporting

Configurable dashboard reports allow you to see risk trends and compare data across business units.
